COOKIE MANAGEMENT
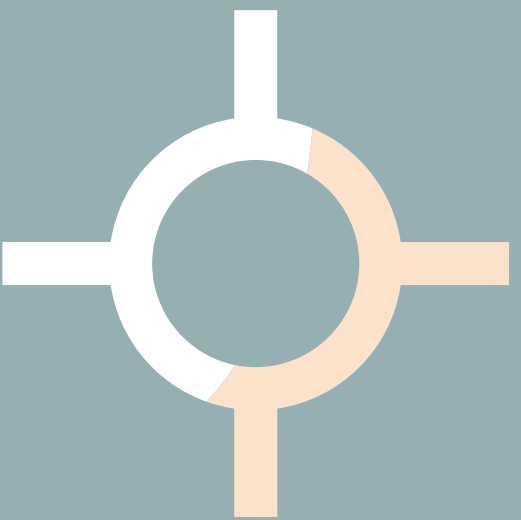

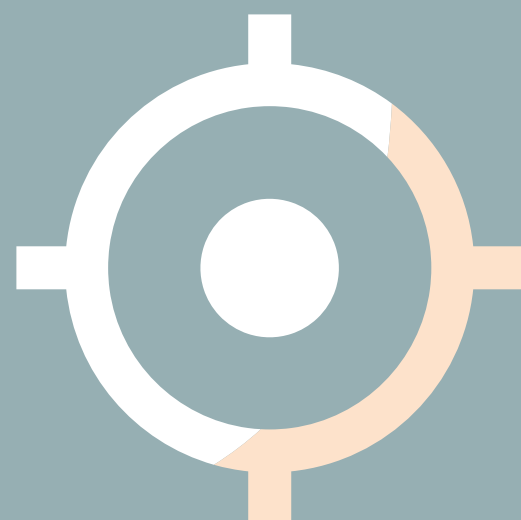

WHAT ABOUT COOKIES?

We use "cookies", which are not yummy cakes but small text files sent from a web site and stored in the user's (i.e. your) web browser or mobile application. You can enable or disable non-essential cookies, by clicking "I refuse" on our website cookie banner. It's easy.

WHAT DOES A COOKIE DO?

Basically, it recognizes users and tells the website your last activity on that website. How? Once the cookie is stored and the user surfs on the same website, the data stored in that cookie notifies the website.

WHAT ARE OUR COOKIES FOR ?

This site uses cookies from Matomo Cloud, which is recommended by the CNIL. These cookies identify the content that interests you the most and to identify certain malfunctions.
